ABOUT ME

Experienced Backend Developer with over 4 years of expertise in Java and Spring Boot. Proficient in designing scalable microservices architectures and developing REST and GraphQL APIs. Skilled in optimizing performance and ensuring secure software solutions. Passionate about delivering innovative and effective solutions in dynamic startup environments.

WORK EXPERIENCE

16/09/2022 – 06/11/2024 Balıkesir, Türkiye

Backend Developer Saganetwork Telekomunikasyon A.Ş

- Worked on ERP, CRM, Social Media Platforms, and Marketing Platforms projects.
- Developed backend systems using Java and Kotlin.
- Built applications with the Spring Boot framework.
- Rest API (HTTP, GraphQL, WS)
- Worked with Data JPA (PostgreSQL, MySQL) and NoSQL (MongoDB, Redis).
- Implemented Spring Cloud (Gateway, Authentication, Authorization, OAuth2), OpenFeign, MQ (RabbitMQ, Kafka).
- Utilized Docker for containerization and Vault for secure secret management.
- Managed load balancing with Docker Swarm and Eureka.
- Monitored system performance with Grafana.
- Architectural projects with microservice architecture

EDUCATION AND TRAINING

20/09/2023 – CURRENT Balıkesir, Türkiye

Computer Programming Bandırma Onyedi Eylül University Gönen Vocational School

Website <https://gonen.bandirma.edu.tr/>

DIGITAL SKILLS

BACKEND

Java | Kotlin | Spring Boot | Spring Data | Spring Security | Spring AOP | Spring Cloud | Hibernate | JPA | Microservice Architecture | Build Tools: Maven, Gradle | Web API (REST/GraphQL) | Unit Testing | OpenFeign | GraphQL

DATABASE

MySQL | PostgreSQL | MongoDB | Redis

TOOLS

Docker | Kubernetes, Docker-Swarm | Kafka | RabbitMQ | Git | Linux | Grafana

PROJECTS

10/03/2024 – CURRENT

Modular Portal

Reduce code load on a single project and provide an ecosystem with only the necessary features in a very simple way.

Link <https://github.com/emirhannaneli/modular-portal>

06/11/2023 – CURRENT

Service Utils

You can find the details on github.

Link <https://github.com/emirhannaneli/service-utils>

24/10/2024 – CURRENT

PayTR API Integration - JAVA SDK

This Kotlin project provides a comprehensive factory class to facilitate seamless integration with the PayTR payment gateway. It enables creating, sending, and handling payment requests, callback verification, and refund requests to PayTR, with fully customizable configurations.
